

Edubrain

"To democratize access to high-quality academic support by building the next generation of explainable AI for education."

At a Glance

Product Overview	An AI-powered academic learning companion that delivers instant, step-by-step explanations for homework and study materials.
Primary Audience	High school and college students, lifelong learners.
Subject Coverage	90+ academic subjects, specializing in advanced STEM (Calculus, Physics, Chemistry, Engineering) and Humanities.
Pricing Model	Free tier available with immediate access (no sign-up required). Premium ad-free access starts at \$4/week.

Core Capabilities

- **Snap & Solve:** Advanced OCR instantly recognizes text and formatting from photos and scanned PDFs, bypassing manual data entry.
- **Explainable AI Reasoning:** Functions as a "patient tutor" by prioritizing step-by-step logic and methodology over bare answers.
- **Zero Friction Onboarding:** Generates accurate, immediate responses in under 60 seconds without requiring user accounts or credit cards.
- **AI Flashcards & Notes:** Converts dense lecture notes and multi-page PDFs into concise summaries and smart flashcard decks.
- **AI Humanizer:** Rewrites AI-generated text into clear, flowing, naturally structured language while maintaining the original meaning.

Leadership Spotlight

Harry Southworth

Head of AI Development

Harry spearheads Edubrain's technical vision, focusing on responsible AI design, digital literacy, and pedagogical alignment. His research and industry commentary on the practical applications of AI tools and digital personas have been featured in top-tier publications including *TechRadar*, *Yahoo Finance*, *BuzzFeed*, and *Fast Company*.
